

Dário Barroca
Software Developer
in Training

ABOUT ME

After 6 years working as a physical therapist, I felt the need for a change and decided to look for a new career that would fulfill and challenge me while also allowing continuous growth.

42Lisboa programming school allowed me to do that and it became my only focus.

I am passionate about solving problems and I believe that the soft skills I acquired in my previous career can make me a valuable asset.

TECHNICAL SKILLS

Languages:

Portuguese : Fluent

English: Fluent

French: Fluent

Digital:

C 1 year

C++ 200h

Kotlin (Android Dev) Beginner

CURRENT SITUATION

SEP 2021 -
Now

Student at 42 Lisboa, a programming school belonging to a successful multinational platform dedicated to solve the lack of qualified software developers. The cursus is based on project creation in C/C++ with the following highlights: development of a UNIX Shell based on Bash; Creation of a raycaster similar to the one used in Wolfenstein3D; Construction of C++ templates that replicate the behavior of map, vector and stack (STL library). The 42 concept is based on autonomy and development of research and technical skills.

FORMER EXPERIENCE

2015 - 2021

Assessment, planning and treatment of patients suffering with pain, injuries and disabilities in fast-paced environments and always focusing on creating meaningful relationships with every single one of them.

EDUCATION

2011 - 2015

Bsc in Physical Therapy from the Escola Superior de Saúde Dr. Lopes Dias of Instituto Politécnico de Castelo Branco;
